## Opening of Dedicated Website for Energy Solutions Business

Daiichi Jitsugyo Co., Ltd. (Headquarters: Chiyoda-ku, Tokyo, Representative Director, President and CEO: Ichiro Uno, hereinafter referred to as "DJK") a general machinery trading company, is pleased to announce the opening of a specialized website (<https://djk-energysolutions.com/>) focused on our Energy Solutions Business.

On the dedicated website, DJK introduces a variety of manufacturing equipment utilized in the lithium-ion battery manufacturing process, comprising the primary lineup in our Energy Solutions Business. Given the rapidly increasing demand for such equipment in the European and American markets, we provide information in English especially for related manufacturers in those countries and regions. Through this website, DJK aims to offer a rich lineup of equipment and detailed specifications for each piece of equipment, covering various processes from electrode material manufacturing and assembly to charge-discharge testing. In addition, we plan to proactively share case studies of various projects.

DJK will continue to strengthen its commitment to the lithium-ion battery market, working towards the realization of a decarbonized society.
